

LASERWEEDER

PRECISION LASERTHINNING USING THE CARBON LASERWEEDER™

AI-powered automated thinning for optimal plant spacing, growth, health, and yield.

- » No manual labor or clean-up crew needed
- » No chemicals, spraying, or bed-top soil disturbance
- » No separate dedicated equipment for thinning

Breakthrough Performance and Consistency

- Eliminates 99% unwanted doubles (*ie, misses ~1% doubles*)
- Keeps 99% of desired plants (*ie, kills ~1% keepers*)
- Sub-millimeter accuracy
- 1 - 2 acres per hour thinning coverage
- Works in virtually all weather
- Works in all soil conditions
- Day and night operation
- Thin and weed simultaneously
- AI deep learning thinning models for any crop and any plant spacing/configuration
